

Problem Statement (PS):

Brightlanes Technologies, via its mental health platform **Lisners**, is launching an Android/iOS app offering low-cost access to trained counselors through a **community-first, storytelling-based** model. The main problem is **low adoption and high stigma around mental health** in College students and **Tier-2 and Tier-3**, who often lack awareness, access, and trust in digital mental health platforms. The challenge is to build **early traction, normalize help-seeking**, and drive **community engagement** through culturally relevant, affordable, and scalable digital solutions.

Task on Marketing Strategy

Design a **marketing strategy** for the Lisners mental health app with a focus on effectively on College students and **Tier-2 and Tier-3**. Your goal is to craft a launch plan that builds trust, encourages app adoption, and sparks community participation.

In your submission, include:

- Identifying the target market
- Positioning Plan for Lisner
- De-stigmatization and regional storytelling ideas
- Community engagement approach
- Marketing funnel and user acquisition plan
- Budget for strategy
- Measurable benchmarks to track

Evaluation Based On:

Clarity of Target Market Understanding, Creativity and Feasibility of Marketing Tactics, Cultural Relevance & De-stigmatization Approach, Sustainability & Retention
